I like the online approach and the live sessions which complimented the online system; the set-up online was clear and informative and well-structured with clear reference to further reading, and the assessment sections created the ability to build your assessments as you go. It all had a good flow and there was flexibility given to the time scale for completion as the ability to organise team coaching can take some preparation. I really enjoyed the course which has not only extended my qualifications for team coaching but has enhanced my coaching and general day to day operation as a manager of a team and being part of a team and has provided insights that I may not have experienced or gained otherwise.

I have learnt so much about myself and Team Coaching. It is a completely different experience to individual coaching or indeed supervision. It has enabled me to use all of my learning, skills and experience to help others. It is truly rewarding but also complex and challenging.
